Art is a Reflection of our Inner Self

INSIGHT ABOUT MYSELF

I am a 4th year sculpture student and I recently shifted my focus on terracotta and ceramics sculptures. I am curious and excited while I handle such conventional mediums which are very flexible in nature. This flexibility somehow is attached with me which pushes my limits to create more of such forms. I enjoy the process and the flexibility of these materials more than the concept which makes me euphoric, calm and related while working.
