VJ RENJU

Photography & Design Studio

      vjrenju

Renjith VJ popularly known as VJ Renju, is a well-known creative person, a graphic designer and a self taught budding photographer hails from Kerala. He got into the art field in his young age. Once he understood his inner talent (swadharma) he never looked back. He has been working extensively for Chinmaya Mission (all over the world) for the last Seventeen years. He built his career by working in many major cities like, Chennai, Mumbai, Pune, Ernakulam, etc. He worked for Aircel, BSNL, Madras University, etc. And now he is doing freelance.

He also virtually growing up amongst passionate photographers, he developed serious interest in photography in his middle age. But the moment he picked up his camera he never looked back. He likes to shoot mostly anything. He likes the challenge of going from shooting landscape one day to close up the next and dabbling in portraiture the day after. He loves nature, and great use of color. So in lot of his photographs you'll see varying vibrant colors of mother nature. In his own view there is no colour only light and shades make this miracle. Sharing this knowledge and engage himself in a more meaningful way.
