
ART PORTFOLIO

SACHIN SASTRY C.

BIO

You are the creator of your own destiny. I am Sachin Sastry C, an art student pursuing master's program final semester. I'm an artist who is filled with varied emotions, expressions, ideas, and energy. After my completion of 12th grade, convincing my parents and getting an admission to B.V.A in "Kalamandir School of Arts" was quite a task. Learning the basics and gradually building my interest toward Abstract was done. My forms and usage of colours are noticeable through the evolution of my works. By studying Aesthetics and art history which completely changed my work of art, Textures, roughness, composition, colour balance, forms etc are being expressed without hesitation. Consciously or unconsciously I started to absorb art from everything. Attending gallery shows of renowned artists and conversing with them to improve knowledge in art is a regular discipline. Attending Biennale and workshops was one of my many responsibilities as a student. Referring to artists and analysing their work and writing my own descriptions about their work is my hobby. My paintings and ideas are unique, which gives me confidence to work and regularly practise. Art expression is considered as one's inner expression. Abstract expression is the base of all the expressions. My work intends to visualise the visual experience which I witness consciously and unconsciously. Considering my present and past situations, my paintings have evolved throughout. Observing deeply into my works the elements which are found are surprising. Movements, dimensions, spacing, are the prime factors. Building up an idea on the platform (canvas) directly and going through the process and completing it can be witnessed while I'm working. The above statement gives a glimpse of my character and my artwork.
